Bid Bulletin No. 1

"Procurement of Enterprise Endpoint Security Solution with Patch Management for the Department of Trade and Industry"
Bidding no. 23-048

December 22, 2023

This Bid Bulletin No. 1 is hereby issued to modify or amend the Bidding Documents.

Section VII. Technical Specifications

PREVENTION MODULES	
Security Server	A dedicated virtual machine that ensures a high level of protection and performance that deduplicates and centralizes most of the antimalware functionality of antimalware agents, acting as a scan server.
MANAGEMENT CONSOLE	
General Requirements	The solution must have built-in two-factor authentication (2FA) that works with authenticator apps (Google and Microsoft) and does not require additional hardware and license to setup.
	Must have the capability to add, remove, arrange, configure, and customize the dashboard report and does not limit the IT admin to a fixed dashboard.
	Quarantine files can be stored up to 180 days and can be remote restores with configurable location or delete from management console.
	The administrator can customize installation packages including only desired modules: firewall, content control, device control, power user, EDR sensor.
	The proposed solution must provide integrated Endpoint Detection and Response (EDR), Endpoint Risk Analytics (ERA), and Sandbox Analyzer manageable in the same console without the need for additional virtual/physical hardware and license.
	The proposed integrated Endpoint Detection and Response (EDR), Endpoint Risk Analytics (ERA), and Sandbox Analyzer must be the same brand as the proposed Endpoint Protection. No additional agent must be installed.
PATCH MANAGEMENT MODULE	
General Requirements	The proposed solution must have the capability to patch Operating System (OS) and some third-party software application across Windows-based and linux-based (CentOS, RedHat, and SUSE) workstations, physical servers, and virtual servers.
	Shall provide ability to create a patch inventory.

BIDS AND AWARDS COMMITTEE

G/F Trade and Industry Bldg., 361 Sen. Gil Puyat Avenue, Makati City

☎ (+632) 7791-3363/3367
🌐 www.dti.gov.ph   ✉ BACSecretariat@dti.gov.ph

	Shall have the ability to set different schedules for security and non-security patches and postpone reboots for patching requiring a restart.
	The proposed Patch Management can be integrated to the proposed Endpoint Protection and does not require an additional agent or virtual/physical hardware to install.
	The proposed Patch Management must be the same brand as the Endpoint Protection and manageable in the same console.

For the guidance and information of all concerned.
