1	<p>1. PROJECT DESCRIPTION/RATIONALE:</p> <p>The Department of Trade and Industry (DTI) is a government agency responsible for promoting the country's economic growth and development. To support its IT operations, DTI uses cloud environment. This environment provides DTI with the on-demand computation, storage, security, and network capabilities it needs to quickly design and execute IT systems and applications. These services are essential to the agency's daily operations and those of its offices to deliver better service to its clientele.</p> <p>At present, DTI utilizes the Amazon Web Services (AWS), a cloud computing platform that provides a wide range of services, including compute, storage, and networking capabilities. AWS is a highly scalable and flexible platform that can help DTI improve the speed and efficiency of its operations while reducing costs. By leveraging AWS, DTI can reduce the need for on-premises infrastructure and the associated costs of maintenance and upgrades.</p> <p>With this, DTI aims to continue its AWS subscription through a Cloud Service Provider (CSP). By procuring AWS services through a CSP, DTI can also benefit from the expertise and support of a trusted partner. The CSP can provide DTI with guidance on how to optimize its use of AWS services, as well as provide ongoing support and maintenance to ensure that DTI's systems are functioning correctly and efficiently.</p> <p>2. OBJECTIVES:</p> <p>The objectives of the project are as follows:</p> <ul style="list-style-type: none"> • Provision of cloud services through a Cloud Service Provider for DTI Information Systems AWS accounts. • Cloud optimization to enhance the efficiency, performance, and cost-effectiveness of Amazon cloud resources such as processing power, storage, and networking. Cloud optimization aims to make sure that cloud resources are utilized efficiently and effectively to meet DTI's demands. 	<p><i>[Bidders must state here either “Comply” or “Not Comply” against each of the individual parameters of each Specification stating the corresponding performance parameter of the equipment offered.
