The collective members of the Philippine Fablab Network scattered all over the country, has been responding to the COVID-19 outbreak by making protective equipment for our frontliners.

The DTI - Santiago City Fablab is producing Face Shields using a 3D Printer and Aerosol Box using a CNC Machine. As of 31 March 2020, As of March 30, 2020, the FabLab Santiago City has produced a total of 293 pieces of face shields and turned it over to Southern Isabela Medical Center (1st batch) and Cagayan Valley Medical Center (2nd batch).

The Provincial Government of Isabela, LGU Santiago City, the LPCDC-Isabela, DTI-2 Regional and Provincial Offices, and a host of generous MSMEs and individuals have contributed to support the FabLab project.
