Shared Service Facility Project of DTI Region IX – Zamboanga del Sur

JH Cerilles State College Research and Extension Department is getting ready to turn over more than 100 units of face shields produced in the Fabrication Laboratory for the COVID-19 frontliners in the province.

This is in response to the shortage of PPEs our frontliners are experiencing especially the staff in Zamboanga del Sur Medical Center.

The face shields are produced using 3D printer and laser cutting machines provided by DTI Zambo. del Sur under the Shared Service Facility Program.
